

# PRODUCT SPECIFICATION SHEET

clearitWell<sup>™</sup>  
safer. cleaner. better.<sup>®</sup>

**PRODUCT:**

**ClearitWell<sup>™</sup>**

**MANUFACTURER:**

Blue Earth Products<sup>®</sup> 14580 West 99<sup>th</sup> Street, Lenexa, KS 66215 Phone: 1.800.259.4472

**BENEFITS:**

ClearitWell improves flow rates and water quality in water wells resulting from biofouling and associated deposit accumulations. Periodic treatments provide continuous maximum well performance. ClearitWell treatments are less corrosive to metals (safer on pumps, casings, and screens) and more effective at breaking down biofouling (underlining source of most deposit buildups) than other traditional chemical treatments. ClearitWell also works well as a cleaning aid during mechanical well remediations.

**DESCRIPTION:**

ClearitWell is an NSF certified well cleaning and rehabilitation aid. It is a two part product which includes, as an ingredient, the deposit removing power of Blue Earth Products' Clearitas<sup>®</sup> product. ClearitWell aggressively breaks down the deposits and fouling that block water flow through screens, gravel pack, and aquifers.

**PROPERTIES:**

|             | Part A                                | Part B              |
|-------------|---------------------------------------|---------------------|
| Composition | Clearitas / Sodium Hypochlorite Blend | Organic Acid        |
| Weight      | 9.0 lbs. per gallon                   | 8.7 lbs. per gallon |
| Color       | Yellow                                | Clear               |
| Odor        | Chlorine                              | Odorless            |
| pH          | 12                                    | 2                   |

**APPLICATION:**

ClearitWell is used by mixing each part with water then pouring the treated water into the well. A single 10 gal batch of ClearitWell (5 gal of each component) makes 330 gallons of treatment solution. A ClearitWell treatment requires treatment solution equal to 2 to 5 times the borehole volume. (ex. 10 gal of ClearitWell will treat a borehole size of 64 to 160 gal) After dosing, let the well soak for 24 to 72 hours and then flush to waste. Detailed instructions are provided with the product.

**STORAGE:**

Store ClearitWell locked up in original container or corrosive resistant container and avoid exposure to direct sunlight and heat.

**DISPOSAL:**

ClearitWell should be disposed of according to local, state and federal regulations.

**SAFETY:**

ClearitWell causes severe skin burns and eye damage, is toxic to aquatic life, may be corrosive to metals and must be handled according to the Safety Data Sheet. Use immediately after mixing Part A and Part B into the treatment solution, insuring good ventilation, the mixture has potential for chlorine gas evolution.

Refer to SDS for more detailed information

**NSF/ANSI:**

Standard 60 Certified – Well Cleaning Aid, Well Rehabilitation Aid

**WARNING:**

Handle all Blue Earth Products' ClearitWell products according to Safety Data Sheets. Use immediately after mixing Part A and Part B into the treatment solution, insuring good ventilation, the mixture has potential for chlorine gas evolution.
